

# Safety Recordable Rate

## 62 GSC Sites Achieve Zero Recordables in 2018

The SMART program was created in the early 1990s to establish fundamental safety principles for a safe Sherwin-Williams work environment. As a result of the employee involvement and heightened communication that this program generated, Global Supply Chain (GSC) has seen continuous safety improvement throughout the past decades. Today's S-W Cares platform builds upon the SMART program foundation.
