Non-Hazardous Solid Waste

Treatment & Disposal

Pounds per 100 lbs of Production

Within our Global Supply Chain in 2018, we generated 0.57 pounds of non-hazardous solid waste per 100 pounds of total production.

Our goal was to reduce non-hazardous solid waste to 0.61 pounds per 100 pounds produced through waste elimination, reuse and recycling.

* Sherwin-Williams acquired Valspar on June 1, 2017. Non-hazardous solid waste data from 128 or 128 GSC facilities were included.

** The non-hazardous solid waste generation rate from the historic Sherwin-Williams GSC facilities was 0.47 pounds per 100 pounds of production.

*** The 2020 goal is based on a 5% annual reduction from the new 2017 baseline value.
Within our Global Supply Chain in 2018, we recycled or reused 1.09 pounds of non-hazardous solid material per 100 pounds of total production.

* Sherwin-Williams acquired Valspar on June 1, 2017. Non-hazardous solid material data from all GSC facilities were included.

** The non-hazardous solid material reuse & recycle rate from the historic Sherwin-Williams GSC facilities was 1.24 pounds per 100 pounds of production.
Within our Global Supply Chain in 2018, we recycled or reused 0.98 pounds of non-hazardous solid material per 100 pounds of total production.

Our goal is to reduce non-hazardous liquid waste to 0.95 pounds per 100 pounds produced through waste elimination, reuse and recycling.

* Sherwin-Williams acquired Valspar on June 1, 2017. Non-hazardous liquid waste data from all GSC facilities were included.

** The non-hazardous liquid waste generation rate from the historic Sherwin-Williams GSC facilities was 0.88 pounds per 100 pounds of production.

*** The 2020 goal is based on a 2.5% annual reduction from the new 2017 baseline value.
Non-Hazardous Liquid Material

Reuse & Recycle

Pounds per 100 lbs of Production

Within our Global Supply Chain in 2018, we recycled or reused 1.25 pounds of non-hazardous liquid material per 100 pounds of total production.

* Sherwin-Williams acquired Valspar on June 1, 2017. Non-hazardous liquid material data from all GSC facilities were included.

** The non-hazardous liquid material reuse & recycle rate from the historic Sherwin-Williams GSC facilities was 1.72 pounds per 100 pounds of production.
Hazardous Waste

Treatment & Disposal

Pounds per 100 lbs of Production

Within our Global Supply Chain in 2018, we generated 0.94 pounds of hazardous waste per 100 pounds of total production.

Our goal is to reduce hazardous waste to 0.81 pounds per 100 pounds produced through waste elimination, reuse and recycling.

* Sherwin-Williams acquired Valspar on June 1, 2017. Hazardous waste data from all GSC facilities were included.

** The non-hazardous solid waste generation rate from the historic Sherwin-Williams GSC facilities was 0.63 pounds per 100 pounds of production.

*** The 2020 goal is based on a 2.5% annual reduction from the new 2017 baseline value.
Hazardous Material

Reuse & Recycle

Pounds per 100 lbs of Production

Within our Global Supply Chain in 2018, we recycled or reused 0.71 pounds of hazardous material per 100 pounds of total production.

* Sherwin-Williams acquired Valspar on June 1, 2017. Hazardous material data from all GSC facilities were included.

** The hazardous material reuse & recycle rate from the historic Sherwin-Williams GSC facilities was 0.98 pounds per 100 pounds of production.
