Explanation of Change in Quantification of Results:

Increase in off-site release due to an abnormal event and subsequent disposal. Facility pursued opportunities to convert unused material and off-specification batches into useful products for sale.

Objectives and Targets:

Continue to pursue process improvements that will result in reductions in the quantity of toxic materials used, released, transferred or disposed from the facility.

Toxic Reduction Plan Progress:

No use quantity or timeline targets established. No additional actions implemented. No amendments were made to toxic substance reduction plan.
